

Creating a strong password...

We have many accounts for stuff that we love to do online, but how do we keep those accounts safe? *Here are some top tips for creating a strong password...*

Password do's...

- Do make your password at least 8 characters long.
- Do use upper and lowercase letters.
- Do change your password regularly.
- Do keep your password a secret.

Why not try the following to help you create a strong password?

Think of a sentence e.g. I gave up eating mouldy cabbage in 2015.

Take the first letter of each word and the number 2015 to create your new password.
(Iguemci2015)

Password don'ts...

- Don't use part of your email address.
- Don't use names of family members.
- Don't use simple translations i.e.  p@ssword or @pple
- Don't use words from the dictionary.

If your curious to see how strong your password idea is then why not test it on the following website? www.passwordmeter.com
