

Our topic this term is 'Superheroes!' Please could your child/children try to complete at least **one** task during the term and before the Christmas break.

If you have other ideas we will be very excited to share these too. The most important thing is that the children have fun completing it/them.

Either take some photos of yourself or do some drawings of yourself being a superhero at home. Maybe you helped in the kitchen (Wonder Wash-up Woman) or tidied your bedroom (Captain Clean)? Add labels to the picture to explain what you did.	Talk to a real life superhero (e.g. doctor). What can you find out about their job?	Draw a superhero made out of 2D shapes. Don't worry if it doesn't look exactly like them. How many different shapes can you use to make them?	Try listening to superhero theme tunes, for example the 1960s cartoon Spiderman theme song. Make up a song or rhyme about a superhero (can be made up) and write it as you would want it to be sung (like a poem)
Create some simple Top Trumps cards about superheroes. What number would you give Iron man for strength out of 100? So what would you give Captain America, Black Widow or the Hulk?	Write a book review of a superhero story that you've read. It could be a book, a comic or anything else that's written, but no films. What did you enjoy? Did you like the way it ended? Who would you recommend it to?	If each letter of the alphabet equals a number, starting at a = 1, b = 2 and so on, what would be the value of a superhero name? For example Batman = $2+1+20+13+1+14 = 51$ Take your time and use resources to help you with the adding on each time (you could have a picture of them).	Show how you have shown independence and responsibility (this can be presented however you want).
Create a poster for a film about a new superhero who would help around our school or area such as Green Litter – he is really good at recycling!	Research one superhero in depth. How did they become a superhero? Who are their friends or family? Who are their enemies?	Make a flipbook showing the adventures of a superhero stick person!	Make a house fit for a superhero out of junk materials found around the house/garden.
All the superheroes come to you for their costume design. Create a range of costumes for different superheroes with different powers. How would you change them to suit their personalities?	In History we are learning about fire-fighters from the Great fire of London, who were superheroes! Can you tell me some facts about fire-fighters?	Write some of your own word problems about superheroes and see if an adult can answer them. E.g. if superman saved 10 people one day and 6 another, how many people would he have saved altogether?	Make a meal fit for a superhero to give them lots of energy for their missions! Think about our Science lessons and having a balanced diet.

Each week your child will be given spellings to learn. They have the choice to learn 5 (mild), 7 (medium) or 10 (spicy). They will be tested every Friday. The children will also be given 1 or 2 Mathletics tasks a week (usually just a 10 question activity) – if they have trouble completing it at home they can use school time to complete it, if they let us know.
